Programming

- **Front-end Development:** JavaScript · (Next.js | ReactJS | Typescript) · CSS · SCSS · HTML.
- **Back-end Development:** PHP (Lumen Micro Framework | Laravel) · Node.js · Nest.js · Ruby · Ruby on Rails · Python · Golang.

Development & Services

Socket.io · Cloudinary · Docker · Redis · Kafka · Vercel · Railway · AWS · Webhook · GraphQL · Restful APIs · Git.

Database

MongoDb · MySql · Postgresql · Supabase · Prisma (ORM) · Firebase · Clerk · Strapi.

Tools

Postman · Trello · Clickup · Visily · Telegram.

PROFESSIONAL EXPERIENCE

FPT Polytechnic College of Ho Chi Minh

Aug 2023 - Feb 2024 Part-Time

Front-end Developer

- Led front-end development using React, Next.js, and Redux, optimized the performance for 239 projects in the system, helping to handle a large amount of user traffic with smooth experience.
- Contributing to the development of web interfaces and enhancing user experience for over 33.8k students.
- Involved in 153 ongoing projects, providing consistent support for front-end development, optimizing performance, and collaborating with cross-functional teams to ensure timely delivery and high-quality results.

BYTEZ TEAM

June 2024 - September 2024 Full-Time

Front-end Developer

- Project Contributions: Contributed to Bytez Pro and Cloudify projects, optimizing the website's performance and user interface. Led the development of API integrations, improving overall team performance and enhancing user experience.

Back-end Developer

- **Career Progression**
 - Started as an Intern Back-end Developer, progressing to Full Stack Developer in the R&D team. Took on more responsibilities in system optimization and product development.
- **Project Contributions**
 - Contributed to various outsourcing and internal product projects, improving system functionality and performance. Key projects include:
- **Vietnam Food Map:** Led backend development and API optimization, collaborating with the team to build the backend system. Integrated AI through AWS, and implemented GraphQL and RESTful APIs for seamless data handling and improved performance.
- **Trung Nguyen International – King Coffee & Appnoithat & FlyFood:** Collaborated with the team to optimize APIs, fix bugs, and add new APIs for better system performance.
- Developed the Vincss Single Sign-On module for enhanced user security.
- **Key Responsibilities**
 - System Optimization: Refactored and optimized legacy systems to improve performance, stability, SEO, and user experience.
 - Product Development: Contributed to backend architecture and development of new product features, ensuring seamless integration with other systems.

PROJECTS

Gloria - Digital menu system helps you manage menus easily

Jan 2024 - Apr 2024 Part-Time

Front-end Developer

- Developed and maintained front-end using Next.js and TailwindCSS, optimized user experience leading to a 40% reduction in load time.
- Implemented real-time notifications using Socket.io, enhancing user engagement by 20%.

Perry Toc Chien – A Seamless Dual Booking Platform

Jan 2025 - Feb 2025 Freelance

Full-stack Developer

- Achieved a Real Experience Score (RES) of 95 on Google PageSpeed Insights, ensuring fast load times and seamless interactions for optimal user experience.
- Optimized page performance with a First Contentful Paint (FCP) of 2.18s, Largest Contentful Paint (LCP) of 2.43s, and Cumulative Layout Shift (CLS) of 0.04, providing a smooth and stable loading experience.
- Implemented SEO best practices, enhancing site visibility by optimizing key pages for fast indexing and improving search engine rankings.
